Description

A passionate learner with experience in **Full Stack Development** and **Data Structures & Algorithms**. Enjoy building projects, solving challenges, and constantly exploring new technologies. Looking forward to contributing and growing .

Education

CSE   **2025**
MIT ADT University, Pune
- CGPA: 8.71 (till 2025)

X (CBSE)   **2021**
Tender Care Home, Chattrapati Sambhajinagar
- 88%

Projects

- Chat - App (Talksy): Developed a real-time chat application using React for the frontend interface with Node.js and Socket.IO powering the live messaging functionality. The system establishes WebSocket connections to enable instant message delivery between users.

- Cloud-Burst Prediction system: Built a prediction system using Random Forest and MLR models with real-time weather data fetched via API.

- Personal Portfolio : Built a responsive personal portfolio to showcase projects, skills having features like dark mode, animations, and contact section.

- Authentication System : Built a secure authentication system with MongoDB, bcrypt ,express to handle login and signup functionality.It includes features like password hashing, form validation, and session management to ensure user data protection and access control.

- Employee Management System : This is a full-stack web application which provides CRUD (Create, Read, Update, Delete) primary operations to efficiently manage employee data build using MERN.
